

Whimiscal Door Knocker

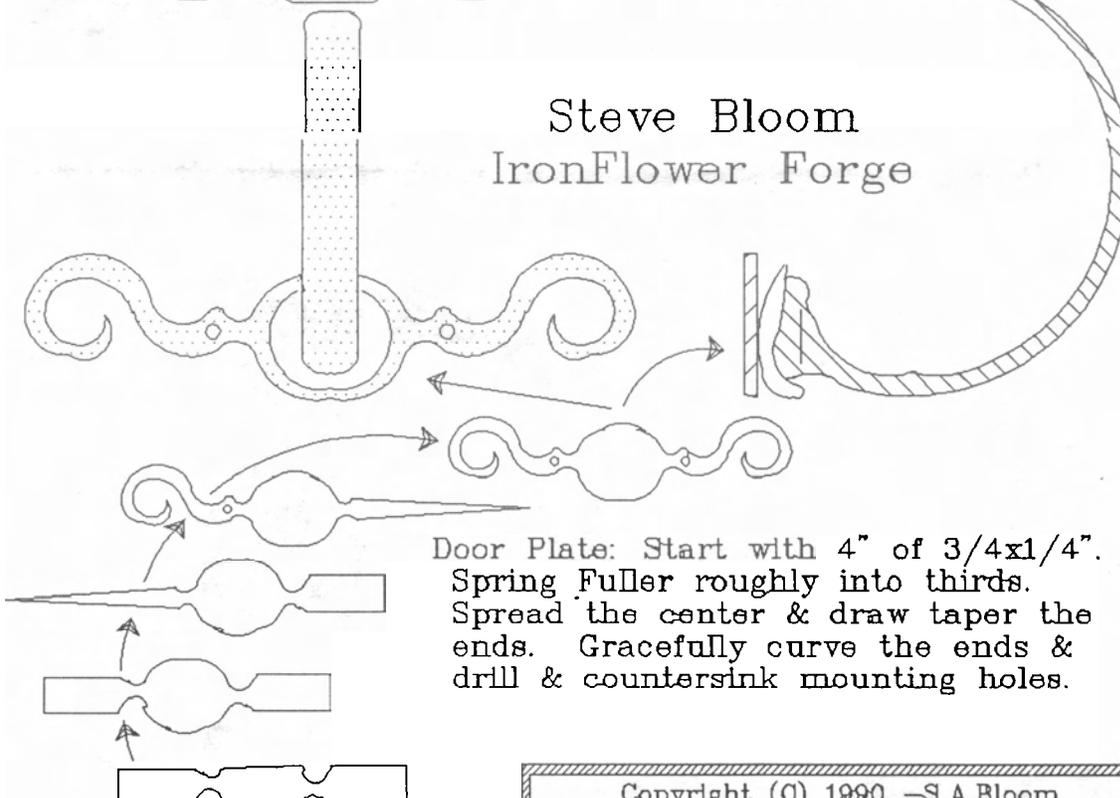

Form a hasp from 4" of 5/8" round stock. Turn ends into flame finials & drill & countersink.

Draw out a railroad spike while preserving the original width. Form a fishtail finial & turn an eye. Wrap the eye around the hasp & curve the spike into a graceful arc bringing the spike head flat to the door plate.

Steve Bloom
IronFlower Forge

Door Plate: Start with 4" of 3/4x1/4". Spring Fuller roughly into thirds. Spread the center & draw taper the ends. Gracefully curve the ends & drill & countersink mounting holes.
